React Native Developer

React Native | TypeScript | Mobile App Development

Energetic React Native Developer with over a year of experience in mobile app development. Skilled in TypeScript, performance optimization, and test-driven development. Committed to delivering user-focused design and high quality code.

WORK EXPERIENCE

Infinitum Tech - Ariana, Tunisia

08/2023 - PRESENT

FullStack React Native Developer

Responsible for Designing and Developing cross-platform mobile apps and NodeJs backends.

AvatarID Mobile App:

- Integrated biometric login (Face ID and Fingerprint Authentication) on iOS and Android, enhancing user security and experience.
- Developed a liveness detection feature to verify the user's live presence during authentication by prompting specific actions (e.g., blinking, head movement).
- Built a user guidance system that provides instructions during the liveness test, ensuring a smooth experience.
- Optimized responsive design for seamless display on multiple device sizes and orientations.
- Implemented pixel-perfect UI aligned with design specifications, ensuring visual consistency across iOS and Android.
- Implemented RSA and AES hybrid encryption for secure communication, using AES for efficient data encryption and RSA for secure key exchange.

AvatarID Backend:

- Developed and deployed the backend server using NestJS to support secure, efficient, and scalable operations for the AvatarID mobile app.
- Implemented a custom request interceptor to decrypt incoming requests from the app and verify that they are encrypted with the proper key.
- Designed a complex solution for launching Python scripts from NestJS for specific endpoints. Verified the authenticity of requests before initiating

- Python processes, allowing seamless integration of Python for computationally intensive tasks.
- Utilized the `child_process` module to spawn Python processes, capturing both standard and error outputs for debugging and ensuring process control.
- Implemented robust file handling to temporarily store images as text files, process them in Python, and parse results back into JSON to send to the client.
- Developed a Python module for facial comparison that integrates with `face_recognition`, `Pillow`, and custom functions.
- Created helper functions to decode base64 images, handle EXIF orientation, and perform face encodings and comparisons.

CGEM - Abidjan, Côte d'Ivoire

09/2018 - 04/2023

Commercial Manager

Managed commercial operations and strategies to increase market share and customer satisfaction.

- Managing day to day tasks of the commercial team.
- Establishing and maintaining relations with costumers.
- Assisting clients technically whenever necessary.

GIT - Sfax, Tunisia

07/2017 - 09/2018

Project Manager

Oversaw project execution and team collaboration to ensure timely delivery and quality outcomes.

- Oversaw project execution and team collaboration, ensuring timely delivery of products with a perfect record of zero delays.
- Managed factory operations, maintaining optimal stock levels to meet export deadlines for key markets including Côte d'Ivoire, Algeria, and Libya.
- Improved product quality through effective oversight and quality control measures.
- Achieved a 17% reduction in production costs by minimizing material waste and maximizing resource utilization.
- Fostered a positive work environment that prioritized worker satisfaction and overall happiness.

Delta Logistics - Sfax, Tunisia

02/2016 - 07/2017

Human Resources Assistant

Assisted in recruitment, training, and employee engagement initiatives, contributing to a cohesive workplace culture.

- Facilitated employee engagement initiatives, such as team-building activities and feedback sessions, to foster a positive workplace culture and improve employee morale.
- Managed employee records and maintained HR databases, ensuring accuracy and confidentiality of sensitive information

Thyna Petroleum Services - Sfax, Tunisia

06/2013 – 07/2013

Internship Trainee

Gained practical experience in the HR department, assisting with recruitment processes and employee onboarding.

EDUCATION

RBK

Information Technology, Full-stack JavaScript Developer (2023)

Faculty of Arts and Human Sciences of Sfax

Licentiate Degree, Business English (2011 - 2014)

PROFESSIONAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend Technologies:

- React, React Native, Expo, Next.js, Angular
- HTML, CSS
- State Management: Redux, Zustand

Backend Technologies:

- Node.js, NestJS, Express, Socket.io,
- Django, Flask
- RESTful APIs, GraphQL, WebSocket

Databases:

- Relational: PostgreSQL, MySQL
- Non-relational: MongoDB

Machine Learning & AI: YOLO v8, Tesseract OCR, Ultralytics, OpenCV

Computer Vision: Object Detection, Image Processing

Deployment & DevOps: Nginx, PM2, Docker

Version Control: Git (GitHub, Bitbucket)

Operating Systems:

- Linux (development and deployment)
- macOS (development)
- Windows (development)

Testing Frameworks: Jest, Mocha, React Native Testing Library

NPM Packages:

- **cra-template-typescript-sarhane-reactts**: A Create React TypeScript template with essential features.
- **react-native-permissions-ui**: A package that facilitates handling device permissions in a customizable way.

LANGUAGES

- **Arabic:** Native
- **English :** Proficient
