### Professional Profile

---

Lead Mobile Developer with 3+ years of experience architecting and shipping cross-platform mobile products end-to-end, from React Native/Expo frontends to NestJS backends. Currently leading a small team delivering full-stack products (Yeiza, Yeiza Business, OpsFlow) live on the App Store and Google Play. Advanced skills in TypeScript, React Native, and Angular, with production experience in event-driven backends (Kafka), biometric/computer-vision systems, and secure API design. Committed to producing clean, maintainable, and test-oriented code.

### Experience

---

**Lead Mobile Developer** DAR GA, Tunis, Tunisia June 2025 – Present

- Lead a small team of developers as technical owner of two full-stack mobile applications (Yeiza, Yeiza Business) — React Native, NestJS, PostgreSQL — reviewing code and steering architecture decisions.
- Designed and built OpsFlow, a field-operations and retail-execution platform: an Angular administration dashboard (role-based access control, geographic nodes, sales channels, SKU management) paired with a React Native/Expo field app for on-site POS visits.
- Implemented Kafka-based event streaming in the NestJS backend to handle reliable transaction processing across business, client, and back-office services.
- Designed loyalty-program features — digital stamp collection, gift cards, and a merchant-facing analytics dashboard for tracking offers and redemptions.
- Supervised the complete development and production deployment cycle on Google Play Store and Apple App Store, ensuring compliance and quality.
- Led continuous integration processes and updates to guarantee stability and continuous improvement of applications.

**FullStack React Native Developer** Infinitum Tech, Ariana, Tunisia August 2023 – June 2025

- Design and development of cross-platform mobile applications and Node.js backends.
- Integration of biometric authentication (Face ID, fingerprint) on iOS and Android.
- Implementation of a liveness detection system with user guidance to secure authentication.
- Implementation of RSA and AES hybrid encryption to secure communications.
- Built a Flask microservice (with request rate limiting and CORS) for facial-recognition comparison, orchestrated from a secure NestJS backend handling process management and image encoding.

**Commercial Manager** CGEM, Abidjan, Ivory Coast September 2018 – April 2023

- Sales team management and strategy development to increase market share.
- Technical customer support and relationship maintenance to ensure satisfaction and loyalty.

**Project Manager** GIT, Sfax, Tunisia July 2017 – September 2018

- Project supervision with deadline compliance and quality improvement.
- Operational process optimization and production cost reduction by 17%.

**Human Resources Assistant** Delta Logistics, Sfax, Tunisia February 2016 – July 2017

- Support in recruitment and staff training.
- HR database management and team-building activities organization.

## Open Source & Personal Projects

---

### react-native-klarna-inapp-sdk

- Contributed to Klarna's official React Native wrapper for their in-app payments SDK, used by other developers integrating Klarna payments.

### Personal Portfolio — sarhane-ghribi.vercel.app

- Designed and built an interactive portfolio (Next.js, TypeScript, Three.js) centered on a fully working phone-OS simulation — a custom app switcher, swipeable home screens, and live interactive demos of shipped work.

## Skills

---

**Programming Languages:** JavaScript, TypeScript, Python

**Frontend Frameworks and Libraries:** React, React Native, Expo, Next.js, Angular, Redux, Zustand

**Backend Development and APIs:** Node.js, NestJS, Express, Flask, Socket.io, RESTful APIs, GraphQL, WebSocket, Kafka

**Databases:** MySQL, PostgreSQL, MongoDB

**Artificial Intelligence and Computer Vision:** YOLO v8, Tesseract OCR, Ultralytics, OpenCV, object detection, image processing

**DevOps and Deployment:** Nginx, PM2, Docker

**Version Control:** Git, GitHub, Bitbucket

**Operating Systems:** Linux, macOS, Windows

**Testing and Quality:** Jest, Mocha, React Native Testing Library

### Published NPM Packages:

- cra-template-typescript-sarhane-reactts: A Create React App TypeScript template with essential features.
- react-native-permissions-ui: A package facilitating customizable device permissions management.

## Education

---

**RBK**, Information Technology, Full-Stack JavaScript Developer 2023

**University of Sfax**, Bachelor's in English Language and Literature 2011 – 2014

- Credential evaluated by World Education Services (WES) as equivalent to a four-year Canadian Bachelor's degree (Educational Credential Assessment for IRCC immigration purposes).
